Ladies and Gentlemen:

Pursuant to the Administrative Rules of Montana, Section 16-2.2(2)-P2030, Rule IV, the following Preliminary Environmental Review has been prepared by the Department of Health and Environmental Sciences concerning Heavy Chevys Blackfoot Truck Parts in Bonner, Montana.

The Purpose of the Preliminary Environmental Review is to inform all interested governmental agencies, public groups or individuals of the proposed action and to determine whether or not the action may have a significant effect on the human environment. This Preliminary Environmental Review will be circulated for a period of fifteen (15) days at which time a decision will be made as to our future action.

If you care to comment on this proposed action, please do so within the allotted time.

Sincerely,

LARRY D. MITCHELL

Recommendation concerning preparation of EIS Not Necessary

PER Prepared by: Larry D. Mitchell

Date: August 26, 1982

General Comments

This proposed facility is located within 1000' of the right of way along Highway 200. As such the Montana Department of Highways must concur with any licensing decision made by this department in accordance with Section 75-10-213 MCA 1979. The facility is required by the Motor Vehicle Recycling and Disposal law and rules to be screened from public view. The applicant has constructed a board fence of sufficient height and density to satisfactorily shield his vehicle inventory from public view. Additionally, a light to moderate stand of ponderosa pine helps shield the facility from the highway. As long as the screening is maintained and junked vehicles stored behind the fence, the facility will be in compliance with the screening requirements of the law.

There are no local land use zoning regulations in effect which could prohibit the establishment of a motor vehicle wrecking facility at the proposed location. The proper operation and maintenance of a motor vehicle wrecking facility at this location is not expected to have any significant or irreversible impacts on the environment. A minor amount of time and effort will be required of state and local junk vehicle program officials in conducting routine inspections of the facility. If properly operated, that effort should be minimal.
